

How to Change your Domain Password

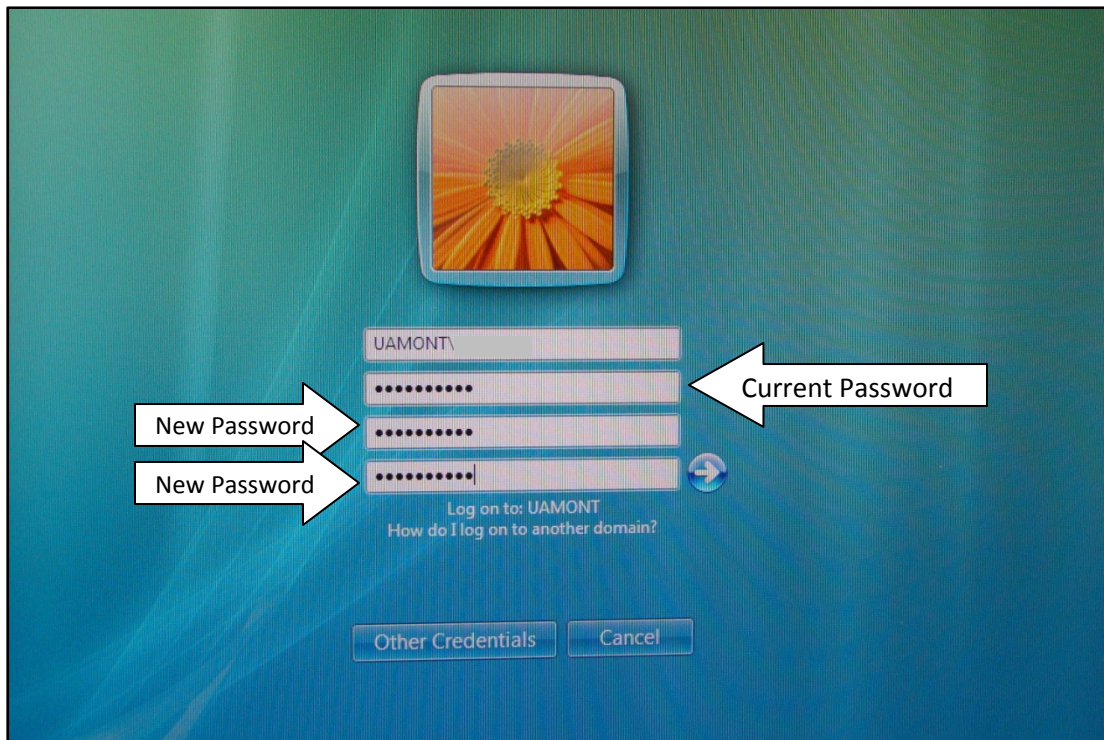

(Computer & E-mail)

Once you are logged on to your computer and are ready to change your password, first hold down **CTRL+ALT+DELETE** at the same time.

Your screen should then look similar to the one below.

Next, click on the button that says **Change Password**.

You will now, in the spaces provided, enter your current domain password and what you would like your new password to be. Once you have done this, click on the **Arrow**.

Your domain password has now been changed.

If you need further instruction, please call us at 870-460-1820.
