College of Forestry,
Agriculture, and Natural
Resources

August 20, 2021

Copies of this publication and data are available in electronic format at: <https://www.uamont.edu/academics/CFANR/index.html> or by contacting the Arkansas Center for Forest Business: Dr. Matthew Pelkki , email: pelkki@uamont.edu or office phone: (870) 460-1949, The University of Arkansas at Monticello College of Forestry, Agriculture, and Natural Resources P.O. Box 3468 Monticello, AR 71656-3468.

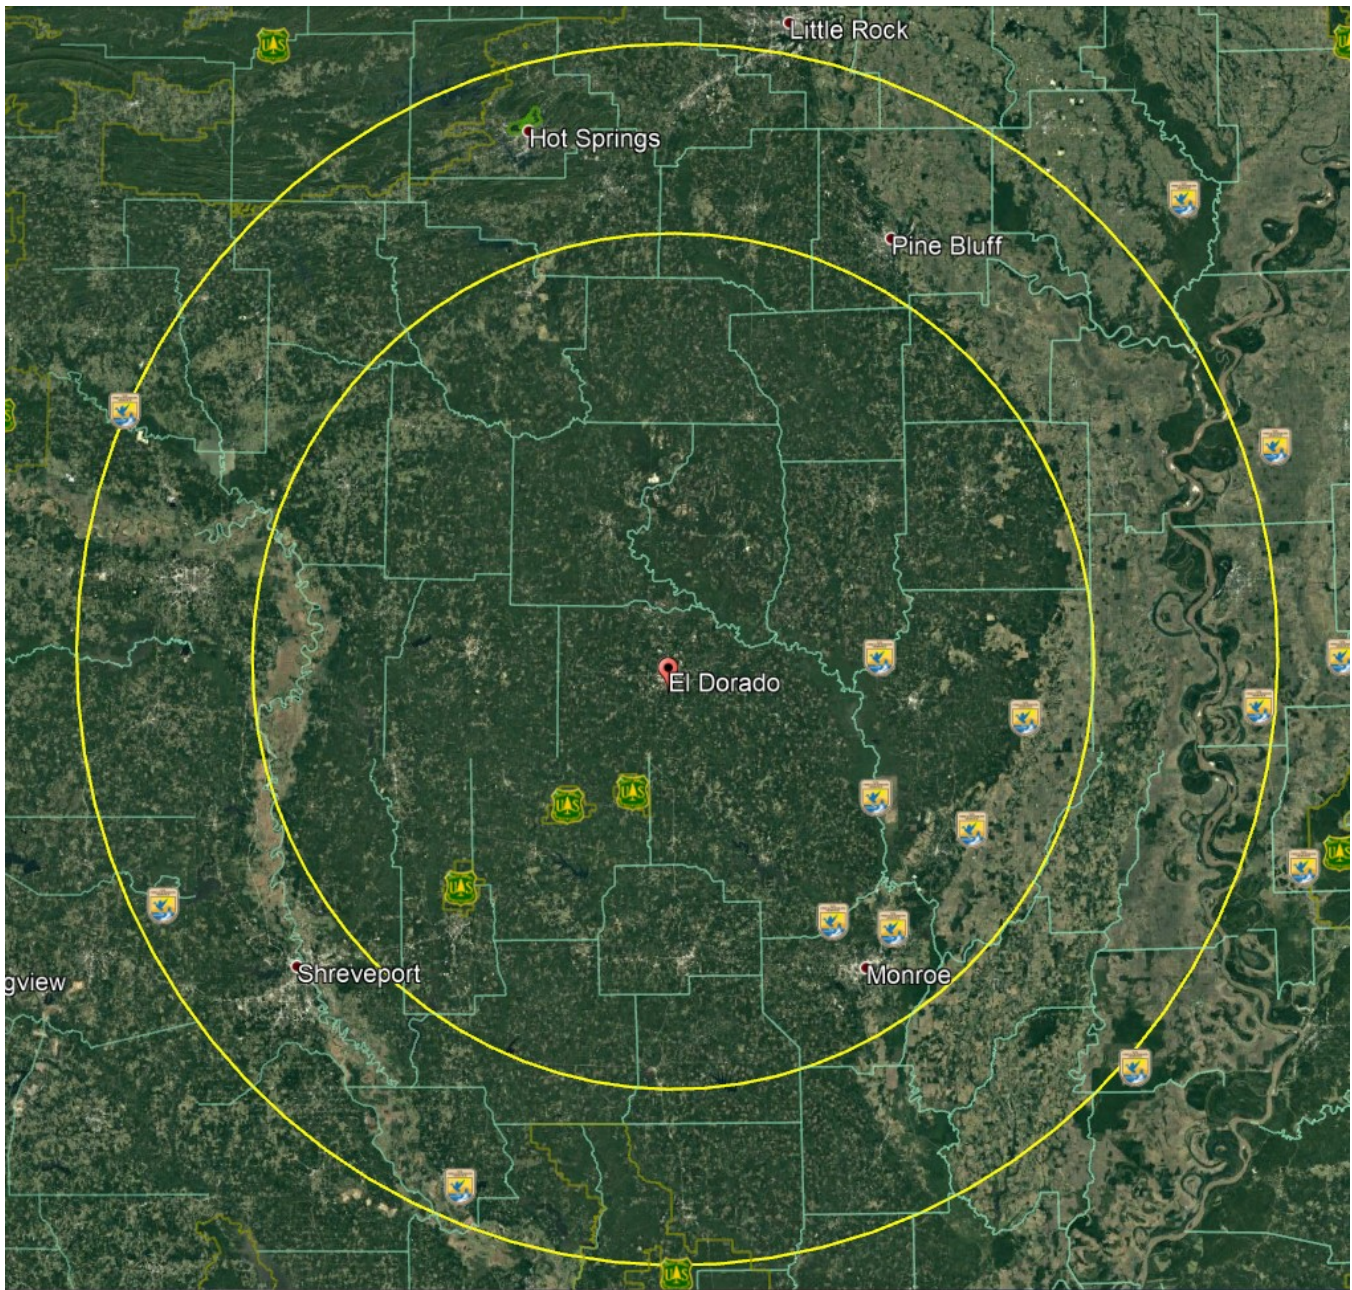

Figure 1. 70 and 100 mile radii from El Dorado, Arkansas.

Summary

The timber resources in the 70-miles surrounding El Dorado, Arkansas can support additional harvests greater than 5.6 million tons per year in pine saw logs and 2.9 million tons in pine pulpwood and top wood. Within 100 miles, these values increase to 7.8 and 3.4 million tons per year in saw logs and pulpwood/top wood, respectively. Annual hardwood removals could increase by 1.1 million tons in saw logs and 0.5 million tons in pulpwood and top wood, with these values increasing to 2.7 and 1.2 million tons, respectively, in a 100-mile radius.

This data comes from the most recent FIA data (2018 – LA, 2019 – AR, MS and TX) and does not reflect changes in forest cover, growth, or removals from that time to present. Changes in existing mill production and other forest disturbances could have a substantial effect on the values provided here, and those changes will likely increase over time.

Highlights of Tables

- There are 7.8 and 13.4 million acres of forest land within 70 and 100 miles, respectively, of El Dorado, Arkansas
- Pine is the dominant forest type in the region (50%) followed by bottomland hardwoods (22%) and upland hardwoods (17%)
- Naturally regenerated forests cover account for 63% of all forestland in the region, but 64% of pine covertypes are artificially regenerated. Only 9% of non-pine forests are artificially regenerated
- 92% of the forest land is privately owned and forest growing stock, growth, and removals are generally proportional to ownership
- Within 70 miles of El Dorado
 - 268 million tons of pine growing stock, 188 million tons of which is pine saw timber and 80 million tons of pulpwood and top wood
 - 187 million tons of hardwood growing stock, 108 million tons of which is saw timber and 79 million tons is pulpwood and top wood
 - Annual surplus in pine growth is 5.6 million tons in saw timber and 2.9 million tons in pulpwood
 - Annual surplus in hardwood growth is 1.1 million tons in saw timber and 0.5 million tons in pulpwood
- Within 100 miles of El Dorado
 - 409 million tons of pine growing stock, 288 million tons of which is pine saw timber and 121 million tons of pulpwood and top wood
 - 355 million tons of hardwood growing stock, 202 million tons of which is saw timber and 153 million tons is pulpwood and top wood
 - Annual surplus in pine growth is 7.8 million tons in saw timber and 3.4 million tons in pulpwood and top wood
 - Annual surplus in hardwood growth is 2.7 million tons in saw timber and 1.2 million tons in pulpwood and top wood

Purpose/Objectives

The purpose of this analysis is to create a one-time snapshot of merchantable timber around El Dorado Arkansas. The data tables attached will provide information on the following:

- Forest area within 70 and 100 miles aerial radius of El Dorado, Arkansas by ownership and forest type group (Tables 1 and 2)
- Forest area within 100 miles aerial radius of El Dorado, Arkansas by forest type group and stand origin (Table 3)
- Forest area within 100 miles aerial radius of El Dorado, Arkansas by county/parish and forest type group (Table 4)
- Within 70 miles and 100 miles for major species groups and ownership groups:

Methods

The USDA Forest Service Forest Inventory and Analysis (FIA) database is the source of the data for these tables. Data comes from the Arkansas (2019), Louisiana (2018), Mississippi (2019), Oklahoma (2018) and east Texas (2019) inventories, which, at the time of this report are the most current available. The online software EVALIDATOR and DATIM processed the database queries for these reports.

EVALIDATOR and DATIM can be accessed on the FIA National Program website (<https://www.fia.fs.fed.us/tools-data/>).

Some specifics to the database queries are important to note:

- The center of the analysis radii of 70 and 100 miles is 33.207630 degrees north latitude and - 92.666267 degrees west longitude (center of El Dorado, Arkansas)
- The results show acre and tonnages based on forestland based on FIA definition (FIADEF)
- Ownership categories are either PUBLIC or PRIVATE
- Areas are in acres
- Tree biomass is reported in GREEN SHORT TONS

This report is an initial survey of forestland resources. The Arkansas Center for Forest Business upon request can provide more detailed analysis and information regarding the region.

Table 1. Forest acres by forest type group and ownership within a 70-mile radius of El Dorado, Arkansas in 2019.

Forest type group	Total	Public	Private
