OPIOID OVERDOSE EMERGENCY TREATMENT (NARCAN/NALOXONE USE)

★ / LIFE AT UAM / HEALTH & WELLNESS / OPIOID OVERDOSE EMERGENCY TREATMENT (NARCAN/NALDXONE USE)

Arkansas law requires that opioid overdose rescue kits be located on each campus of state-supported institutions of her higher education.

UAM has installed over 40 opioid overdose kits across our campuses. These kits provide Naloxone, an opioid overdose reversal medication that will improve the capacity of bystander rescuers to save the lives of victims of opioid overdose.

Naloxone is safe and effective and has no effect on non-opioid overdoses.

INSTRUCTIONS TO ADMINISTER NALOXONE

USE NALOXONE FOR DRUG OVERDOSE

You should give naloxone to anyone who has taken drugs and may be overdosing. Someone who is overdosing may stop breathing or their breathing may be slow and labored. Act fast! An overdose is life threatening.

Naloxone is a safe medicine. Give naloxone even if you do not know what kind of drug a person took. It only reverses overdoses in people with opioids in their systems.

1. Check for a response

- . Try to wake them up. Shake them and shout their name.
- Rub your knuckles hard on the center of their chest.
- Hold your ear close to their nose, listen and feel for signs of breathing.
- Look at their eyes, lips, and fingernails. Small "pinpoint" pupils and pale blue or gray skin and nail color are signs of overdose.

2. Call 911

- Tell the operator your exact location.
- Say you are with a person who is not breathing.
- Tell the operator you are going to give the person naloxone.
- Follow any instructions you get from the operator.

3. Give naloxone

GOOD SAMARITAN LAW

Individuals who have overdosed and their helpers are protected by the Joshua Ashley-Pauley Act. They will not be charged for possession of a controlled substance if they have sought medical assistance.

SIGNS OF OVERDOSE
