Addressing Unplanned Pregnancy Prevention Among College Students

- Arkansas is **#1** in birth rates for 18–19-year-olds and unplanned births result in **1 in 10 college dropouts***. The topic of preventing unplanned pregnancy is relevant for both college men and women, for those who are already parents, as well as those who are not parents.

OPIOD OVERDOSE EMERGENCY TREATMENT (NARCAN/NALOXONE USE)

Arkansas law requires that opioid overdose rescue kits be located on each campus of state-supported institutions of her higher education.

UAM has installed over 40 opioid overdose kits across our campuses. These kits provide Naloxone, an opioid overdose reversal medication that will improve the capacity of bystander rescuers to save the lives of victims of opioid overdose.

Naloxone is safe and effective and has no effect on non-opioid overdoses.

WHAT IS AN OPIOID OVERDOSE EMERGENCY?

The signs and symptoms of an opioid overdose emergency can include:

- ✓ Unusual sleepiness or unresponsiveness
- ✓ Breathing will be slow or absent
- ✓ Slow heartbeat or low blood pressure
- ✓ Skin feels cold and clammy
- ✓ Pupils are tiny
- ✓ Nails and lips are blue
- ✓ Snoring, Gargling Sounds & Clammy Skin

Approximately every 12 minutes, someone overdoses on opioids. Are you prepared?

INSTRUCTIONS TO ADMINISTER NALOXONE

USE NALOXONE FOR DRUG OVERDOSE

You should give naloxone to anyone who has taken drugs and may be overdosing. Someone who is overdosing may stop breathing or their breathing may be slow and labored. Act fast! An overdose is life threatening.

Naloxone is a safe medicine. Give naloxone even if you do not know what kind of drug a person took. It only reverses overdoses in people with opioids in their systems.

1. Check for a response

- Try to wake them up. Shake them and shout their name.
- Rub your knuckles hard on the center of their chest.
- Hold your ear close to their nose, listen and feel for signs of breathing.
- Look at their eyes, lips, and fingernails. Small “pinpoint” pupils and pale blue or gray skin and nail color are signs of overdose.

2. Call 911

- Tell the operator your exact location.
- Say you are with a person who is not breathing.
- Tell the operator you are going to give the person naloxone.
- Follow any instructions you get from the operator.

3. Give naloxone

GOOD SAMARITAN LAW

Individuals who have overdosed and their helpers are protected by the Joshua Ashley-Pauley Act. They will not be charged for possession of a controlled substance if they have sought medical assistance.

SIGNS OF OVERDOSE

- Person is unresponsive
- Slow or shallow breathing
- Small “pinpoint” pupils
- Vomiting
- Cold, clammy skin
- Gurgling or snoring
- Blue or gray lips and nails
