

Workday Student

Multiple Institutions, One Login

Through Workday, students attending more than one University of Arkansas System institution will be able to track their progress toward degree completion using a single login. It's a simpler way to view their educational journey, all in one place!

Students enrolled at multiple UA institutions can view each of their program's requirements in one place, see where they stand academically, and determine what courses are still needed.

Paying tuition and fees, reviewing financial aid, registering for classes, and more can all be done in Workday with one login.

No more logging out of one system to access another.

More autonomy. Greater insights. Better decisions.
